Griya Putra Mandiri Blok C.17, RT/RW 007/009, Bojong Pondok Terong, Cipayung, Depok, Jawa Barat, Indonesia

Fresh graduate with practical experience in full-stack web development and cross-platform mobile apps. Delivered a deployed car rental management system for a real client using Laravel, and built Flutter app features during an industry internship. Strong fundamentals, quick to adapt, and committed to writing clean, reliable code.

Work Experiences

PT. Digital Angkasa (Codelabs Indonesia) - **South Tangerang, Indonesia**   Feb 2025 - May 2025

Mobile App Developer Intern

Codelabs is a smart IT solutions provider specializing in the development, implementation, and maintenance of Mobile Applications (Android, iOS, Windows Mobile), Web Applications, and Desktop Applications.

- Developed 4+ cross-platform mobile features using Flutter, focusing on responsive UI and seamless user experience.
- Integrated 6–10 REST API endpoints with backend systems, ensuring reliable and efficient data flow.
- Improved app responsiveness by ~20% through UI optimization and widget refactoring.
- Worked in an Agile team environment, contributing to sprint planning
- Maintained clean, well-documented, and modular Dart code aligned with team development standards.
